

Grassmaster®

For a Greener than Green Lawn

N	P	K
11	4	8

- ✓ Fully pelletised – provides for free flowing application, with every pellet containing the same nutrients
- ✓ A superior blend of organic and inorganic nutrients
- ✓ A good balance of slow release major & trace elements
- ✓ Contains added blood & bone, fishmeal & seaweed
- ✓ Contains water soluble nutrients for rapid response
- ✓ Does not contain Urea which can unbalance available N
- ✓ Lasts much longer than chemical lawn fertilisers
- ✓ Helps boost soil moisture retention & improves aeration of the soil
- ✓ Convenient and safe to use

Grassmaster®

Nutrient Analysis		Plus minerals and trace elements including Magnesium & Zinc.
Nitrogen (N)	11%	
Phosphorus (P)	4.0%	
Potassium (K)	8.0%	
Sulphur (S)	8.7%	
Calcium (Ca)	1.25%	

Grassmaster®

Why use Grassmaster?	Grassmaster was developed for the home gardener, using a formulation used widely by professional turf growers and farmers for pasture production.
How long will grassmaster take to work?	Depending on the time of year it could take a couple of weeks and a couple of waterings or rain to start new growth. The soluble N and K will start to green the lawn after a week.
How long will Grassmaster last?	Grassmaster will last longer than straight chemical products because the organic ingredients will continue to release a balance of nutrients for a few months.
What about soil conditioners?	New lawns may need an application of lime and or gypsum to ensure a favourable pH and improve the structure of heavy clays soils. Reapply lime every couple of years to help the fertiliser work better.
Do I have to water Grassmaster in straight away?	YES, you do. IT MUST BE WATERED IN WELL
APPLICATION RATES 50 – 75g per square metre	
New Lawns	Consider the application of lime and or gypsum a couple of weeks before planting. Spread up to 100g of grassmaster per square metre and rake into soil before sowing the seeds, laying turf or planting runners. For large lawns apply up to 10kg per 100 square metres
Lawn Maintenance	Apply 50 – 100g of Grassmaster evenly per square metre of lawn every 3 months and water in well. For large lawns apply 5 – 10 kg per 100 square metres.
WATER IN WELL
