

NATURAL Blood & Bone

Terra Firma's **Natural Blood & Bone** is a high purity, slow-release fertiliser used by home gardeners and conventional growers alike. Blood & Bone is one of the best organic sources of essential nutrients: Nitrogen, Phosphorus and Calcium. This product also naturally improves the soil by stimulating biological activity.

Terra Firma's **Natural Blood & Bone** is available in either 20kg or 1 tonne bulk bags.

Restriction: This product contains animal bi-products (meat meal, blood & bone) and care must be taken when using it on areas where ruminant animals graze. At all times it must be properly incorporated into the soil before allowing ruminants to graze on treated areas. Storage: Store in a dry, sealed, and covered environment away from moisture, small children, and pets.

APPLICATION RATES

AUSTRALIAN NATIVE PLANTS:

Spread no more than 20g per square metre evenly over the soil surface. Rake or dig the fertiliser in and water well immediately after application.

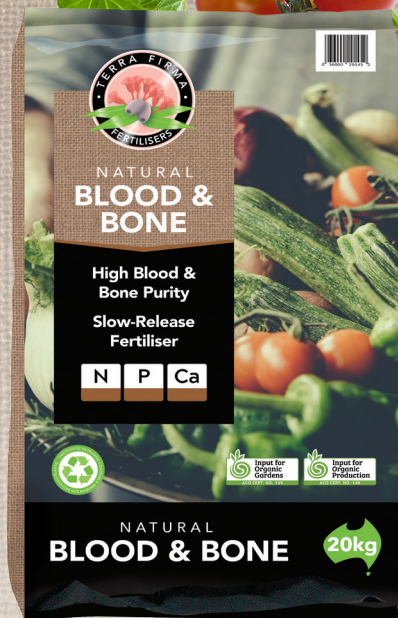

(Note: One adult handful ≈ 50g)

FRUIT, VEGETABLES, TREE CROPS, LAWN, FLOWERS:

Spread approximately 50-100 grams per square metre evenly over the soil surface. Rake or dig the fertiliser in and water well immediately after application.

(Note: One adult handful ≈ 50g)
