

Blood & Bone

a pelletised blend...

Our Blood & Bone product avoids many of the problems commonly associated with traditional Blood & Bone powder. Traditionally, Blood & Bone is hard to spread as a powdered form, can easily be washed or blown away after application, and is a sterile product due to the cooking and drying process. To overcome these problems, we have added a percentage of carbon-rich, fully composted poultry manure which introduces large numbers of beneficial microbes. This generates a biologically active product with improved release of natural nutrients faster than traditional Blood & Bone. Conveniently, this pelletised form ensures that the product will not be washed or blown away and is easier to spread by hand or spinner.

TERRA FIRMA'S BLOOD & BONE PELLETS	TRADITIONAL BLOOD & BONE POWDER
Contains large numbers of beneficial microbes	Sterile
Easy to spread. Easy application through fertiliser spreaders	Difficult to spread & dusty
Pellet form slows and extends the nutrient release period which reduces leaching and wash away, increasing the nutrient use efficiency	Easily washed away, blown away & leached

APPLICATION RATES

GENERAL:

Normal application rate of 200g per square metre.

VEGETABLE & ANNUAL FLOWERS:

Apply 200g per square metre at planting for all vegetables and annual flowers.

ROSES, FRUIT TREES & SHRUBS:

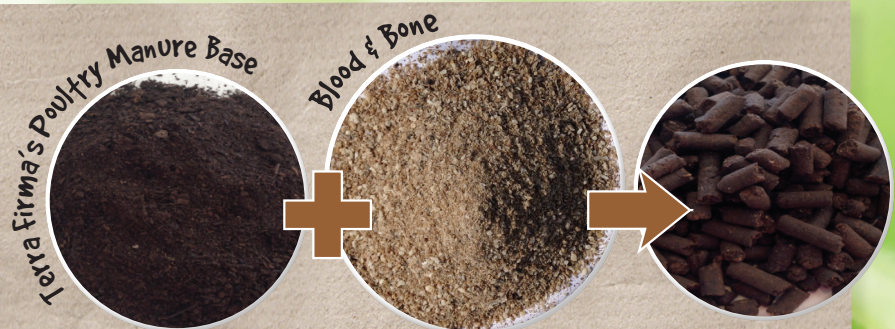

Apply between 200g - 300g per square metre twice yearly, lifting the rate toward 300g if the fruit tree is established.

BROAD ACRE SPREADING:

Apply 200-400kg per acre, on pasture, late Autumn & Winter apply liberally enabling the soil to be primed for production in Spring.

AUSTRALIAN NATIVE PLANTS:

Use no more than 25g per square metre around Australian Native Plants.

Nitrogen (N)	6.40%	Iron (Fe)	400mg/kg
Phosphorus (P)	6.50%	Manganese (Mn)	100mg/kg
Potassium (K)	0.50%	Copper (Cu)	20mg/kg
Sulphur (S)	0.13%	Zinc (Zn)	100mg/kg
Calcium (Ca)	12.8%	Boron (B)	80mg/kg
Magnesium (Mg)	0.23%	Molybdenum (Mo)	2mg/kg
Silicon (Si)	540mg/kg	Cobalt (Co)	1mg/kg
Carbon (C)	24.00%
