## Terra Foska Gold TE A compound blend

A compound blend that combines high-analysis synthetic fertilisers, poultry manure and key trace elements into one pellet to improve plant response. Compound pellets avoid the problem of segregation of fertiliser components common in physical NPK blends that results in uneven fertiliser applications.

Terra Foska Gold TE is a valuable and popular all-round fertiliser that excels in very light soils that are normally prone to nutrient leaching. Containing DAP, Sulphate of Ammonia, Sulphate of Potash, trace elements such as Boron and Zinc, and of course Terra Firma's Poultry Manure Base, this high performing fertiliser is ideal for whatever you are growing.

## Custom Blend Correct your TE

Widely used for commercial applications, our unique Custom Blends are specifically tailored to each grower's particular soil and plant needs. These blends can be comprised of chemical, organic and mineral inputs into a physical or compound blend. A major advantage of our custom blends is the increase in fertiliser use efficiency. Pelletising highly mobile and water-soluble fertilisers with high carbon, biologically rich composted poultry manure slows and extends the rate of nutrient release. Additionally, our ability to manufacture smaller sized pellets is conveniently suited to air seeding applications. Our agronomic services work with each grower to review soil & plant analysis and formulate the perfect blend to achieve the best results. Custom blends can be quoted as delivered prices in either bulk loose, bulk bags, or 25kg bags. (Physical blend min order: 4t. Compound blend min order: 10t.)

### APPLICATION RATES Terra Foska Gold TE

#### PLANTS, FRUITS & VEGETABLES:

**Fruit Trees** - 100-500g, lifting the rate to the higher range if the trees are established.

**Vegetable Beds & Flowers** - 75-100g per square metre.

**Plants & Shrubs** - 30-50g per shrub.

**Roses & Shrubs** - 100g per square metre.

**Azaleas, Native & Acid Loving Plants** - 50g per square metre.

#### NEW LAWNS:

Consider an application of Terra Firma's Lime Impact a few weeks before planting. Spread up to 100g per square metre & rake into soil before sowing the seeds, laying turf or planting runners. For large lawns apply up to 10kg per 100 square metre.

#### LAWN MAINTENANCE:

Apply 50-100g evenly per square metre of lawn every 3 months and water in well. For larger lawns apply 5 - 10kg per 100 square metres.

#### Terra Foska Gold TE

Nitrogen (N)	7.50%	Iron (Fe)	940mg/kg
Phosphorus (P)	4.10%	Manganese (Mn)	240mg/kg
Potassium (K)	6.20%	Copper (Cu)	50mg/kg
Sulphur (S)	6.24%	Zinc (Zn)	1900mg/kg
Calcium (Ca)	1.89%	Boron (B)	1230mg/kg
Magnesium (Mg)	0.53%	Molybdenum (Mo)	5mg/kg
Silicon (Si)	1276mg/kg	Cobalt (Co)	2mg/kg
Carbon (C)	20.00%
